## Summary

Professional, detail-oriented and result-driven web developer with extensive experience in all aspects of client-side web development using web-rich JavaScript frameworks like React and Node.

Passionate about solving problems effectively and efficiently with like-minded individuals.

## Skill Highlights

- |                     |              |                |
|---------------------|--------------|----------------|
| • React             | • Node.js    | • MongoDB      |
| • Angular           | • PHP        | • MySQL        |
| • Vue.js            | • Express.js | • PostgreSQL   |
| • HTML              | • Flask      | • Firebase     |
| • CSS               | • Django     | • AWS          |
| • MUI               | • Golang     | • BitBucket    |
| • Styled-components | • Python     | • GitHub       |
| • Tailwind CSS      | • JavaScript | • RESTful APIs |
| • Next.js           | • TypeScript | • Agile/Scrum  |

## Experience

### Senior Full-Stack Developer

#### Vega IT Sourcing

January 2019 - June 2022   **Novi Sad**

- Led architecture, design, and development of 30+ new features.
- Presented and conveyed ideas and designs with 4+ technical teams and 12+ business partners.
- Developed 40+ applications following Agile product development methodologies.
- Oversaw the development and maintenance of new products, technical documentation and workflows.
- Designed, built and automated data flows to save 10+ hours of tedious work per week.
- Developed 40+ applications following Agile product development methodologies.
- Assisted in requirements analysis, High Level Design, Low Level Design, and complex code development for 20+ applications.

### Full stack developer

#### Nordeus

April 2017 - January 2019   **Belgrade**

- Assisted in requirements analysis, High Level Design, Low Level Design, and complex code development for 20+ applications.
- Provided technical direction and system architecture for 40+ individual initiatives.
- Communicated with line of business and managed the overall status and health of 20+ applications.
- Collaborated with external programmers to coordinate delivery of 6 new software applications.
- Wrote 200+ unit tests to ensure 100% of code within SDLC was without bugs.
- Attended 100+ weekly standup meetings to receive weekly tasks and mentorship from senior developers.
- Maintained 8+ systems and applications as Tier 2 support (break-fix and data changes)
- Integrated existing software into 13 upgraded, modified systems for higher performance

# Junior Full-Stack Engineer

Symphony

June 2014 - April 2017      Belgrade

- Collaborated with 3 engineering and design teams to integrate external APIs into web pages and applications.
- Evaluated and improved existing data systems under mentor supervision.
- Integrated existing software into 13 upgraded, modified systems for higher performance
- Developed 30+ new software solutions by analyzing system performance standards
- Developed code following common security practices and development design patterns
